Professional Summary

I'm a Front End Developer passionate about crafting accessible, visually precise user interfaces, combining thoughtful design with solid engineering. However, by the grace of Allah SWT, I was given the opportunity to completely shift my career path and pursue my passion for web programming something I had already loved since my university days.

Skills

Programming Languages : Javascript, HTML and CSS

Libraries & Frameworks : Vue js, Nuxt Js, Tailwind Css

Tools & Platfroms : Git, Github, Gitlab, And Vercel

Professional Experience

Oct 2019 - Apr 2025 | Front-End Developer | Travellergram Inc.

- Develop user interfaces (UI)
- Build and optimize website or application interfaces using HTML, CSS, JavaScript, and frameworks like Vue.js or Nuxt.js
- Collaborate with design and backend teams
- Translate UI/UX designs into functional code and work closely with backend developers to integrate APIs and server-side data.
- Ensure responsiveness and performance
- Make sure the application is responsive across devices, loads quickly, and delivers a smooth user experience.

Education

Bachelor's Degree in Informatics Engineering

STMIK Mercusuar | Aug 2013 – Aug 2017/2018

Certifications

Certificate of Completion, UI/UX Design Mastery - Skilvul

Additional Activities

In my spare time, I enjoy learning new things—whether it's new technologies or evolving programming stacks. I also actively participate in religious and social activities. I'm currently the head of the youth mosque organization in my neighborhood and serve as the secretary of my local community council (RW). I often spend quality time with my wife, sharing stories about our daily lives.
